Lesson 2 - Jack´s Birthday | Phonemic awareness of the letter B sound and understanding homographs through vocabulary practice.

Soar in Reading 1

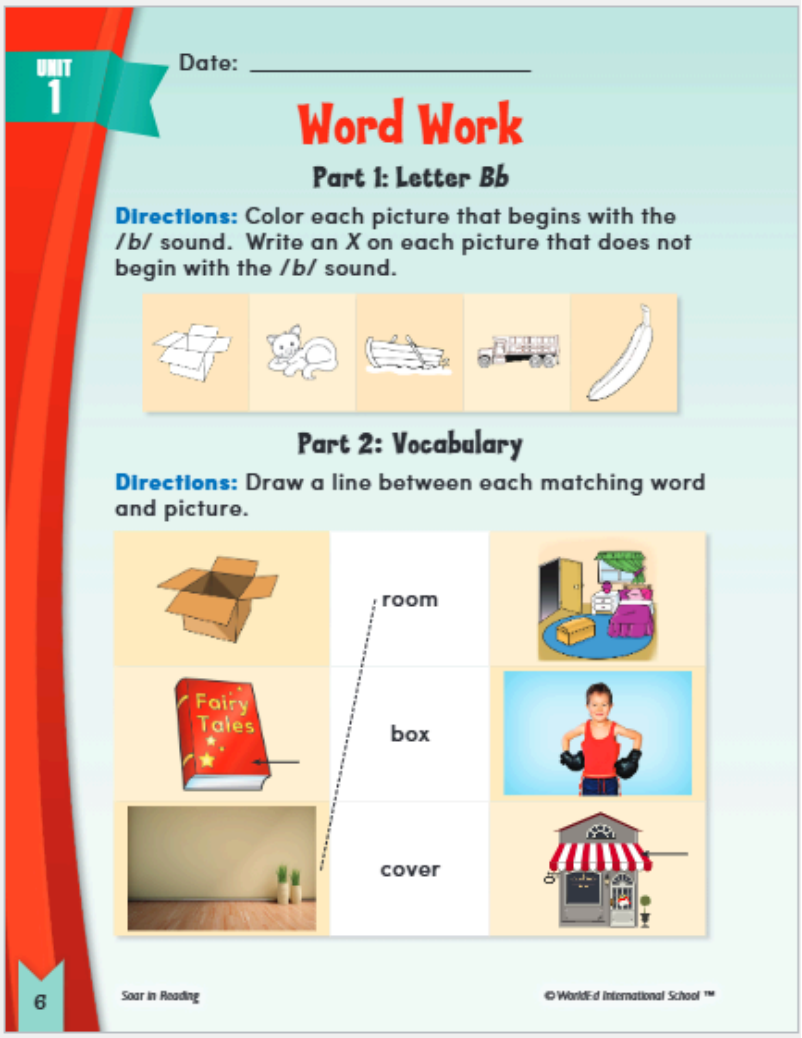
Grade Level: 1

Duration: 40 minutes

Focus: Phonemic awareness of the letter B sound and understanding homographs through vocabulary practice

Subject: English Language Arts – Reading

Pages: 6



UNIT 1

Date: _____

Word Work

Part 1: Letter Bb

Directions: Color each picture that begins with the /b/ sound. Write an X on each picture that does not begin with the /b/ sound.

Part 2: Vocabulary

Directions: Draw a line between each matching word and picture.

Unit 1

Lesson Title: Phonemic awareness of the letter B sound and understanding homographs through vocabulary practice.

Standards Alignment

Relevant Standards:

- **ELA-LITERACY.RF.1.2:** Demonstrate understanding of spoken words, syllables, and sounds (phonemes).
- **ELA-LITERACY.L.1.4:** Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade 1 reading and content, choosing flexibly from an array of strategies.

Lesson Objectives

By the end of this lesson, students will:

- Identify and pronounce words beginning with the letter B sound.
- Understand and apply the meanings of homographs from the Word Work 2 activity.
- Demonstrate phonemic awareness and vocabulary comprehension through guided and independent practice.

Materials Needed

For the Teacher:

- Visual aids with pictures of words starting with the /b/ sound (e.g., ball, bat, boat)
- Flashcards with homographs from Word Work 2 (e.g., "box," "room," "cover")
- Cards for the "Homograph Match-Up" game (one set of homograph names and two sets of images for each homograph)
- A whiteboard and markers
- Page 6 of the student workbook

For the Students:

- Pencils
- Crayons or colored pencils
- Student workbooks open to Page 6

---

1. Presentation (5-10 minutes)

***Objective**: Introduce the letter B sound and homographs vocabulary.*

Hook

A. Project two images on the board: a box (as a container) and box (sport).
B. Ask students, “How do we name these objects or actions?”
C. Write down their answers and guide them to identify that both are called "box."
D. Explain that they will learn more about words like this today.

Introduce the Concept

- Explain: “Both of these are called 'box,' but they have different meanings.
- Words like these, which have the same spelling but different meanings, are called homographs.”
- Project both images again, this time with the word "box" written beneath each, and explain their meanings.

Demonstrate

- Project two sentences on the board: “The box is big” and “These are box gloves.”
- Read both sentences aloud and explain how the same word can have different meanings depending on how it’s used.
- Encourage students to repeat the sentences after you, emphasizing the context of each meaning.

---

2. Warm-Up Activity (5–7 minutes)

***Objective:** Prepare students for vocabulary practice with a fun and engaging game by introducing homographs through visual and contextual clues.*

Activity Instructions:

A. Write the homographs "room," "box," and "cover" on the board. Project the following images on the board:
   - Box as a container and as a sport.
   - Room as a space in a house and as a bedroom.
   - Cover for a book and as a shelter.
B. Present each image to the students and ask them to guess the name of the image. For example, when showing a picture of a container, students might guess "box."
C. After students guess, confirm the correct name and explain which meaning it represents (e.g., "This is a box as a container").
D. Conclude by asking students to share which images they found easiest or hardest to guess, reinforcing their understanding of homographs.

---

3. Practice (5-10 minutes)

Objective: *Guide students in structured practice with phonics and vocabulary.*

Instructions:

- Project Page 6 on the board. Read the directions for Word Work 1 (identifying the B sound) aloud to the class.
- Go through each picture with the students, modeling how to decide if the word starts with B. Ask the name of the image. Wait for them to tell you. Then, pronounce the name of the image and ask them to repeat it after you.
- Next, point to each image and discuss its name with the class. Ask them: "What is it?" and point to the image. After they say, give the proper answer, and ask them to repeat after you.

---

4. Production (10-15 minutes)

***Objective**: Allow students to apply their understanding of homographs independently.*

Instructions:

- Now, direct students to open their books on Page 6.
- Tell them you will read the directions for Word Work 1 (identifying the B sound) aloud to the class.
- Then, ask students to do the activity independently. Remind them to color each picture that begins with the /b/ sound. Write an X on each picture that does not. Model on the board the first picture.
- Circulate to provide support and check for understanding.
- Next, tell students you will read the directions for Word Work 2.
- Ask students to draw a line between each matching word and picture. Encourage students to say each word aloud as they match it. Model the first matching on the board.
- Circulate to provide support and check for understanding.
- Finally project on the board the correct answer.

---

5. Reading for Success Activity (10–15 minutes)

***Objective**: Reinforce vocabulary and phonemic awareness through a collaborative and hands-on activity.*

Activity Instructions:

Game Title: "Homograph Match-Up"

Setup: The teacher should prepare cards for the class:

- One set of cards with the homograph names (e.g., "room," "box," "cover").
- Two sets of cards with images representing each meaning of the homographs (e.g., a picture of a container box and a boxing match, a bedroom and a general space for "room," a book cover and a shelter for "cover").
- Scatter all the cards around the room.

Student Task: Tell all students they will work as a big team collaboratively. Together they will need to find the matching set of three cards: one name card and two image cards for each homograph. Demonstrate the game to students.

Conclude the activity by reviewing the correct matches as a class, projecting the images on the board, and reinforcing the meanings of each homograph.

---

6. Differentiation by Readiness

For Struggling Learners:

- During the "Homograph Match-Up" activity, assign them specific cards or guide them with hints to help identify matches. Pair them with peers who can support their understanding.
- For Word Work 2, provide step-by-step assistance in drawing lines between the words and images. Use guiding questions like, “What is this picture showing?” and “Which word matches this image?”
- Offer visual aids, such as flashcards or images, to reinforce homograph meanings and examples before the production phase.
- Allow extra time and use sentence starters like “This is a _____ that means _____.”

For Advanced Learners:

- During the "Homograph Match-Up" activity, challenge them to explain why the matches are correct and create their own sentences using the homographs.
- Extend Word Work 2 by asking them to create their own drawings of the homographs, illustrating both meanings.
- Encourage them to brainstorm additional homographs and discuss their meanings with the class.
- Provide an optional task to write a short story using at least two homographs, demonstrating their different meanings in context.

---

7. Wrap-Up and Reflection (5-10 minutes)

- **Review Key Points:**

Ask students, “What sound does the letter B make? Can you name some words that start with B?”

Also ask, “What are homographs, and why are they fun to learn?” Write their responses on the board.

- **Reflect:**

Have students share one new word or homograph they learned today. Celebrate their participation and efforts.

Why This Lesson Works

1. **Engagement:** The lesson uses interactive strategies like the "Homograph Match-Up" game and collaborative group activities to maintain high levels of student interest. By integrating visual aids and hands-on experiences, students stay motivated and connected to the material.
2. **Structure:** Each part of the lesson builds logically on the previous one. From introducing the concept of homographs, practicing the B sound, and exploring vocabulary, the activities ensure a seamless transition to independent application and group collaboration.
3. **Differentiation:** Thoughtful scaffolding in activities supports struggling learners, while challenges like creating sentences or stories with homographs engage advanced students. The "Homograph Match-Up" activity encourages teamwork, ensuring all students can contribute meaningfully at their own pace.
4. **Relevance:** By focusing on phonics and homographs, this lesson equips students with critical reading and comprehension skills that are directly applicable to real-world language use. These foundational skills enhance their ability to understand and navigate complex language concepts in the future.
